

GRAPHIC CHARTER

This Graphic Charter is designed with the aim to create uniformity for the display of the proposals. Standardizing the presentation affords clarity for jury evaluation and meets the exhibition intent of creating a reading by classification - in the way of historic architectural treatises - as the selected projects will be interspersed with works that represent a genealogy of constructive rationality since the 16th century. All drawings must be black and white wireframe and line drawing only, including textures and vegetation representation, as per the guidelines of the competition.

Graphic Charter Annexes

Annexes to this Graphic Charter are available as a compressed zip file in the download area, as listed in the Reference Documentation index. To facilitate conformity with the standards of this Graphic Charter, an Annex in DWG and DWXF drawing is available for download. The drawing includes an example of a Worm's eye axonometric view of the Cooperativa La Obrera Mataronense by Antoni Gaudi and templates for layouts.

Drawing Line Styles

Line thicknesses and types are determined by layer as per annex drawing and plot-style file available for download.

Drawing Units

The proposal must be expressed in the metric system; linear units in decimal and angular units in degrees.

Fonts and Paragraph Styles

Annotations and text must be in the font styles Arial Black and Georgia Regular, with font sizes, leading or line spacing, justification and alignments as indicated in the A1 and A3 Layout templates.

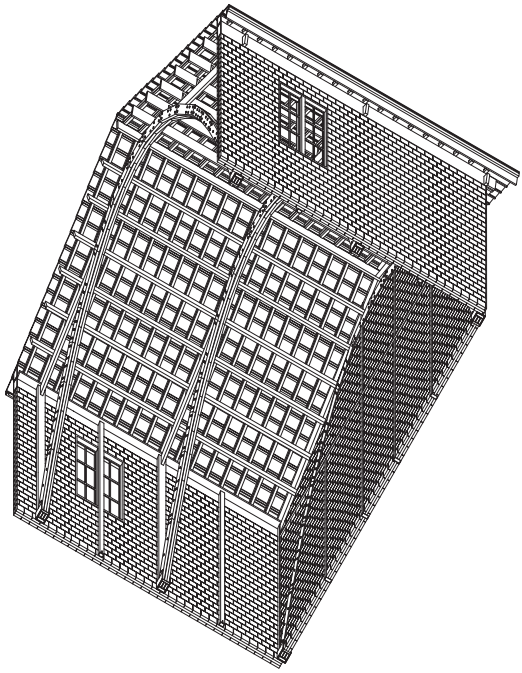

Sheets' Layout

- A1 poster
- A3 Set

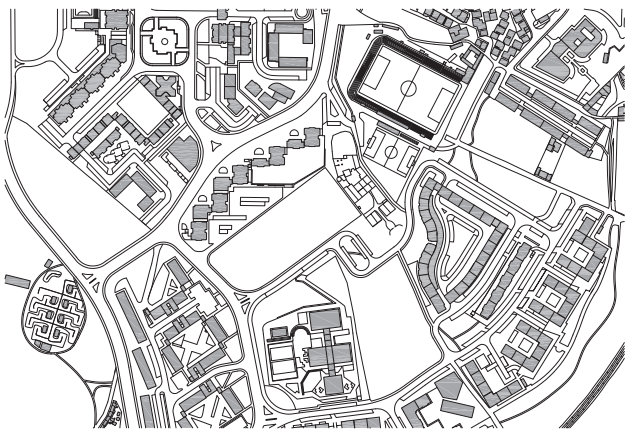

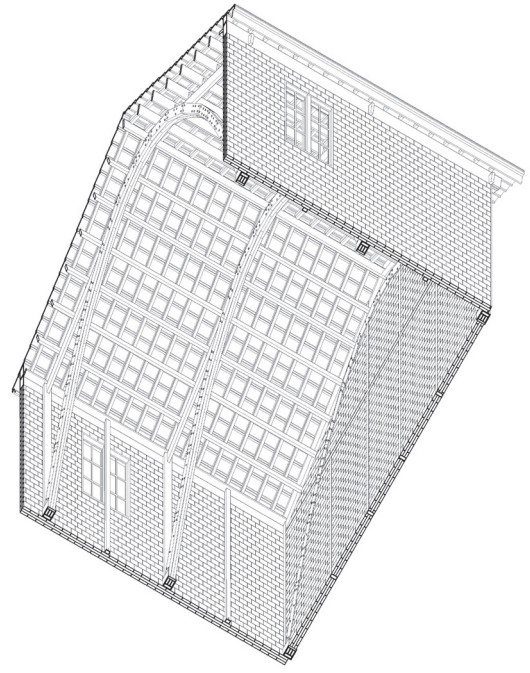

Exports' Recommendation

The format of the proposal is PDF, as per competition Regulations. For clarity of reading of the drawings on screen, it is recommended that the drawings are converted to JPEG format (600 dpi) prior to being incorporated in the final PDF files.
